MEDSOLAR WORKSHOP IN JORDAN
January 28, 2015
The MEDSOLAR project partners have held a workshop in January 2015 to highlight the development of the project in Jordan, with particular focus on the regulation of the Jordan market within the electricity market, the energy management system and the insights of different ENPI CBC Mediterranean Sea Basin Programme projects in the country. The project invests on promoting and implementing innovative technologies in the field of solar energy, particularly PV systems in Jordan, Lebanon and Palestine.

CEDRO EXCHANGE - ENVISION RATING SYSTEM
This month’s issue by Dr. A. Georgoulias from the Zofnass Programme at the Harvard University discusses the Envision rating system for a sustainable infrastructure. Envision aims to fill the gap that current rating systems do not cover: infrastructure. This innovative rating system ensures a wholistic sustainability rating for new developments. The publication tackles the elements of the rating system and its potential in Lebanon.
