SEASON’S GREETINGS

In collaboration with the various stakeholders and beneficiaries / partners, the EU funded UNDP CEDRO project has so far installed 1.17MWp of hybrid solar – diesel systems around the country, hence contributing towards the goal of 20% National target of energy mix from renewables. With the continuous collaborations and support from various parties, we hope to provide further assistance in the coming year. To this, the EU funded UNDP – CEDRO project would like to wish you happy holidays, and a prosperous new year full of collaborations for the promotion of renewable energy.

CEDRO AT BDL ACCELERATE

The EU funded UNDP CEDRO project took part in the third annual BDL accelerate three day conference that took place in November. Dr. Harajli, Project manager, presented the CEDRO project: mandate and tasks along with an overview of the completed projects: monitored performance versus expected performance.

BIOMASS BRIQUETTING PROCESS

As part of the Biomass publication series, a briquetting process report was launched during the biomass forestry workshop held in November. The report details the briquettes production process as installed in the two demonstration sites (Bkassine and Aandket). The report is available for download online and in hard copy at the CEDRO office.
